

IE 509: Lab 3 Quiz

1. Searching ceiling index using Binary Search:

Ceiling value : Given a sorted array and a value x, the ceiling of x is the smallest element in an array greater than or equal to x.

Example :

array = { 1 , 2 , 3 , 4 , 5 , 8 , 9 }

target = 5 , ceiling value = 5

target = 6 , ceiling value = 8

2. Write a python Function to right rotate a list by n

Input : n = 2, List1 = [1, 2, 3, 4, 5, 6]

Output : List1 = [5, 6, 1, 2, 3, 4]

Explanation: We get output list after right rotating (clockwise) given list by 2.

Input : n = 3, List1 = [3, 0, 1, 4, 2, 3]

Output : List1 = [4, 2, 3, 3, 0, 1]
